GRAND MIRRORS

The leading global mirror company, designs and manufactures premium quality lighted mirrors for hotels, salons, and restaurants, as well as for residential projects.

Our ongoing research and development make Grand Mirrors thinner, brighter, and easier to install than ever before.

Every day, we are driven to deliver the highest quality mirrors, equipped with the latest features and technologies to our customers in the US and around the world.

WHY A LIGHTED MIRROR MAKES SENSE?

People who have one, know why, and they will never use a regular mirror without light any more.

When the light is integrated in the mirror, you will have a clear view without shadows on your face because the light is directed towards you.

You don't need to worry any more where to install expensive light fixtures in your bathroom or salon, because a Grand Mirrors lighted mirror will always provide the perfect light when you look in the mirror.

OUR PRODUCTS

MARBLE

This is Grand Mirrors MARBLE Where Elegance Meets Timeless Craftsmanship.

Each frame is a unique work of art, meticulously handcrafted from solid marble. With its distinct veining and luminous polish, it transforms any mirror into a timeless focal point of sophisticated style. Available in classic and statement hues, including Black Classic, White Classic, Sand Cream, Green Forest, and Golden Brown. Elegantly crafted in 75mm and 100mm widths to complement our premier mirror collections.

More than an accessory it's the defining statement that frames your vision. A masterpiece, exclusively for your Grand Mirrors.

LUX

With Grand Mirrors LUX, the mirror is the centre point of your bathroom that you will use and enjoy for many years to come. Fully made-to-measure with a wide variety in LED layouts, and choice of LED colours. Grand Mirrors LUX will fit and upgrade every bathroom.

LED LAYOUTS

MODEL A | MODEL B | MODEL C | MODEL D | MODEL E (TRIFOLD) | MODEL F | MODEL G (ROUNDED CORNERS) | MODEL H (CUSTOM MIRROR) | MODEL J

lumière

Grand Mirrors LUMIÈRE creates a beautiful mirror with its frosted edges. With up to 75mm wide frosted part, the light spreads evenly all around the mirror and goes through the front and back that provides indirect light to the bathroom. It is made to any size that gives an extra dimension to bathroom, hotels, salons, and much more. With our CNC computerised mirror cutting machines, the glasses are built with extreme precision and can create the mirrors exactly in the size and shape you want.

ECLIPSE

Grand Mirrors ECLIPSE is the perfect choice for a backlit bathroom mirror, thanks to its evenly dispersed LED light that radiates from the back of the mirror. Not only does it provide a beautiful reflection, but it also casts a soft, indirect illumination throughout the bathroom, enhancing the atmosphere and overall ambience.

Engrave

Elevate your space with ultra-sharp, permanent laser engraving directly onto mirror surfaces. Grand Mirrors ENGRAVE offers exceptional clarity for logos, branding, and icons, seamlessly integrating into your interior design.

Commercial Advantage
Infuse your business environment with clean, elegant, and maintenance-free branding. Perfect for logos, QR codes, or slogans, it creates a professional identity without extra components.

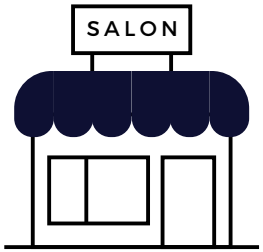

Residential Option
Homeowners can add refined personal details like monograms, quotes, or delicate artwork to complement their décor.

Why Choose Grand Mirrors ENGRAVE?
High-definition, permanent laser engraving.
Maintenance-free, refined finish.
Compatible with all Grand Mirrors models.
For premium branding & discreet personalisation.

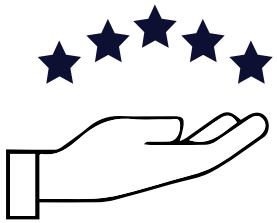

Professional

Founded in 2001, we bring two decades of experience in the mirror and technology industry. With Grand Mirrors, we offer highly customisable mirror solutions, allowing you to unleash your creativity and design your business premises exactly the way you envisage it.

Hospitality

Trusted around the world, Grand Mirrors is the preferred bathroom mirror supplier of hotels, resorts, high-end condominium projects and much more. With countless hospitality projects completed over the past decade, Grand Mirrors continues to innovate new styles and technologies and make mirrors more stylish and useful in any bathroom.

CUSTOMISED MIRROR

More than just a reflective sheet of glass, mirrors are the centrepiece of a space. Be it an office, a living room, or even a bathroom, having the right mirror on display can truly bring everything in the room together - making the spaces you inhabit a pleasant experience for yourself and for everyone who passes through.

But what do you do when, after searching and searching, you just can't find the mirror that's perfect for *you*? What do you do when, forget the style, you can't even find a mirror that can fit where you need it to?

We at Grand Mirrors believe in making mirrors that are made-to-measure, tailoring every item we produce to suit your needs - all while still being unbeatable in quality and value for money.

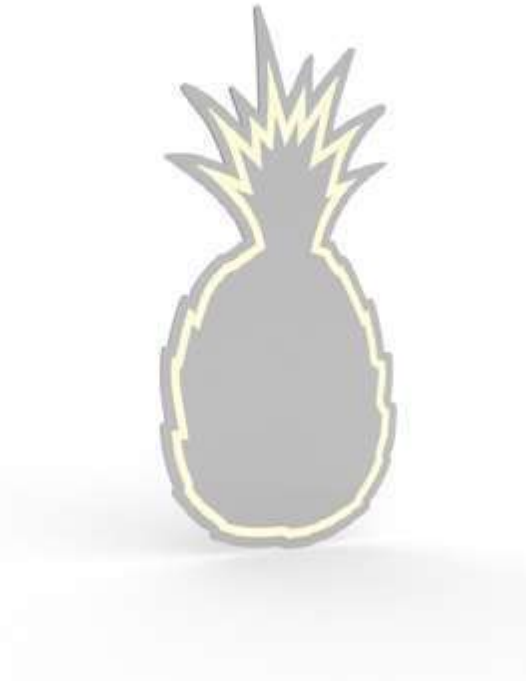

ANY SIZE, ANY SHAPE

With our high precision automatic glass cutting machines, we can reproduce any shape you want with extreme accuracy and sizes up to 7m x 2.4m.

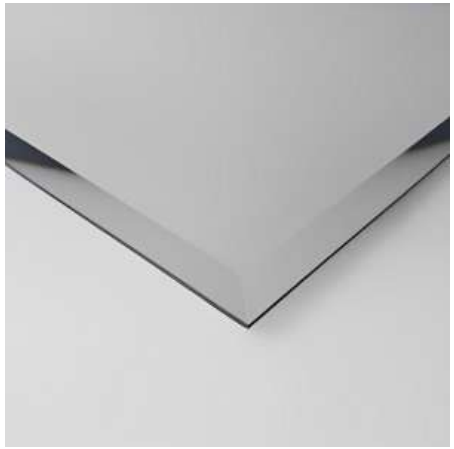

FLEXIBLE QUANTITIES

Grand Mirrors is very flexible. We accept orders in any quantity and size. So you can order 1 mirror or 1,200 mirrors, you are welcome at Grand Mirrors.

PERSONALISED ADD-ONS

Looking for more from your mirror? Explore our wide range of add-ons that elevate your mirror from a stunning centrepiece to a cutting-edge solution you'll enjoy for years to come.

Be sure to check our website for a complete list of available add-ons and what mirrors they can be added to.

BEVELLED EDGES

Our expertly crafted bevelled edges, which are available on the majority of mirrors with bevel widths up to 38mm, will enhance the elegance of your mirror.

CUSTOM CUT-OUTS

Experience precision with our custom cut-outs made to fit light or tap fixtures. We guarantee a perfect fit for your mirror, crafted with remarkable accuracy using innovative CNC technology.

NIGHT LIGHT

Our under-the-mirror night light, which is discreet, will brighten your room. This useful addition improves the atmosphere of your environment by incorporating a concealed sensor.

FRAMES

Enhance your mirror with frames crafted from solid marble, 316 stainless steel, brass, and walnut. These premium materials are designed to offer exceptional durability, elegance, and a timeless aesthetic.

STAINLESS STEEL & BRASS BRACKETS

Select from our premium brackets, crafted from 316 stainless steel and solid brass for superior strength and corrosion resistance. Available in a range of finishes and styles, they offer secure and stylish solutions for mounting mirrors on ceilings and/or worktops.

TOUCH CONTROL

With our simple touch control, you can easily adjust the settings on your mirror. Simple brightness, colour, and programme adjustments while maintaining customised preferences. Touch control, which is compatible with all Grand Mirrors products, provides an effortless user experience.

ROUNDED CORNERS

Rounded corners on a bathroom mirror enhance safety by reducing injury risks, provide a modern aesthetic that complements contemporary designs, and increase durability by minimizing chipping or cracking.

LOGO

Add an illuminated logo to your mirror to make a lasting impression. It's a perfect feature for offices, restaurants, spas, and barber shops.

DEMISTER

Install a demister in your mirror for a crystal-clear, spotless reflection even after a hot shower. To fit your mirror's dimensions, choose from a variety of shapes and sizes.

Demister Power Consumption: 15 W/sq ft (160 W/m²)

AURA

Grand Mirrors AURA combines elegance and technology with a sleek LED band design, available in different shapes, offering a radiant focal point and unmatched lighting. Its slim 10mm design provides precise illumination, ideal for grooming and skincare.

OUR TECHNOLOGY

With all of the lighted mirrors on today's market, it's easy to wonder what exactly the difference between all of them is. What makes a sheet of glass so special? Is it in the lights? The shine? Here at Grand Mirrors, what separates us from our competitors is our dedication to you, our clients. We want only the best of the best reaching you and that means we're continuously innovating to make sure you get an investment you'll enjoy for years and years after.

Here are just a few of the many technologies we've developed over the years to ensure that every mirror is truly a Grand Mirrors.

Ultra-Bright LED Illumination
Exclusive lighting system designed to direct light forward, providing clear, shadow-free illumination.

Safe Low-Voltage Operation
Operates on a 24-volt power system, safe for all bathroom environments.

UL-Certified Wiring
All internal wiring and connectors — the "veins" of the mirror — are UL certified, ensuring long-term reliability, safety, and consistent performance, particularly in humid bathroom environments.

Fully Custom Sizes and Shapes
Made-to-measure mirrors produced in any size or shape.

Integrated Safety Backing
Safety film on the rear prevents shattering in the event of breakage.

Premium Mirror Glass
Highly reflective, top-tier glass with excellent corrosion resistance for long-term clarity.

50,000-Hour LED Lifespan
Equivalent to up to 30 years of use based on 5 hours per day, year-round.

Fast, Damage-Free Delivery
Secure packaging and professional handling ensure safe delivery.

Energy-Efficient LED Lighting
High-efficiency LEDs deliver powerful illumination with minimal heat generation.

Ultra-Slim Profile
World-leading slim design with only a 0.4 in (10 mm) gap between the mirror and the wall.

Laser-Etched Light Panels
Light panels are laser etched to create an ultra-smooth surface with clean, precise edges. Although this process is slower, it delivers superior finish quality, higher light efficiency, and beautifully even illumination.

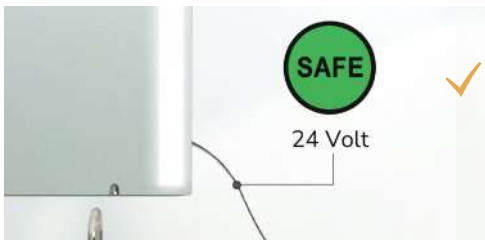

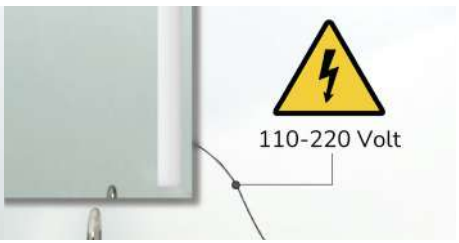

Lightweight, Rust-Proof Aluminum Construction
The rear aluminium frame is corrosion-resistant, lightweight, and maintenance-free.

Precision Computerized Cutting
Exact mirror dimensions and shapes are achieved through advanced computerised cutting technology.

Diamond-Like Polished Edges
All mirror edges are fully polished to a diamond-like finish, delivering a refined, luxurious appearance and superior clarity. The polished edges are easier to clean and maintain, while also reducing the risk of edge chipping.

Premium Optical Acrylic Lenses
Grand Mirrors uses premium Japanese optical acrylic with the highest transparency available. The material is non-yellowing, highly durable, and maintains its shape and clarity over time.

Why Grand Mirrors Is Different

GRANDMIRRORS	VS	Other Mirrors
 **Fully Customisable** Designed and manufactured precisely to your requirements — with no limitations in form, dimensions, or application.	VS	**Limited Options** Typically available only in standard shapes and sizes, with little to no customisation. 
 **Advanced LED Technology** Energy-efficient, cutting-edge LEDs reduce power consumption and operating costs. Specially designed LED housing minimises light loss and maximises usable lumens.	VS	**Basic Lighting Technology** Simple engineering results to light loss and lower efficiency. Illumination is often uneven, and individual LED points may be visible. 
 **Ultra-Thin LED Mirror** LUX features an ultra-slim design measuring just 10mm, delivering a modern, sleek appearance (model dependent).	VS	**Much Thicker Design** Often based on outdated lighting technologies, such as fluorescent systems, resulting in mirrors up to 30-50mm thick, wasting space and compromising a modern bathroom aesthetic. 
 **Safe Low-Voltage System** Powered by a secure 24-volt system for enhanced safety and reliability.	VS	**High Voltage Risk** Uses 110-220V systems directly connected to the rear of the mirror, increasing risk in wet environments and potential conflicts with local electrical regulations. 

GRANDMIRRORS VS Other Mirrors

Durable & Secure

Reinforced safety backing secures the mirror in the event of breakage and protects the silver coating on the rear of the mirror.

VS

Unprotected & Unsafe

Without a safety backing, broken mirrors can scatter sharp fragments, creating hazardous conditions. The exposed mirror coating is also vulnerable to damage and deterioration over time.

Secure Wall-Mounted Installation

Engineered for strong, stable, and long-lasting wall mounting using professional-grade fixings.

VS

2- or 4-Point Mounting

Limited mounting points make installation more difficult and may not provide sufficient strength or stability, particularly for larger mirrors.

High-Quality Mirror Glass

Corrosion-resistant mirror glass with a bright, clear reflection and no green edges — even after years of use.

VS

Standard Mirror Glass

Mirror glass quality varies widely. Lower-grade glass is prone to deterioration, has green-tinted edges, and offers reduced clarity.

Computerised Glass Cutting

Glass is cut with extreme precision using computerised machinery, allowing for exact dimensions in any size, shape, or form.

VS

Manual Cutting

Manual cutting results in larger tolerances than necessary, reducing precision and consistency.

GRANDMIRRORS VS Other Mirrors

Laser-Etched Light Panels

Laser-etched panels provide a smooth surface, precise edges, higher light efficiency, and even illumination.

VS

Sand-Blasted Light Panels

Sand blasting is less precise, can create uneven and rough surfaces, and leaves edges that may trap moisture, accelerating deterioration and corrosion.

Diamond-Polished Edges

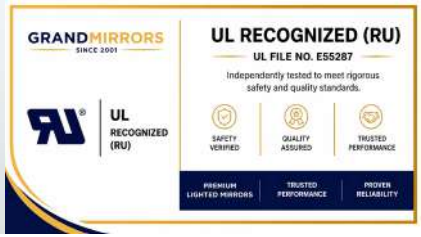

All edges are polished to a diamond-like finish for a refined appearance, easier cleaning, and reduced risk of chipping.

VS

Standard Ground Edges

Standard grinding is a common and fast process, but it produces matte, non-transparent edges that are harder to clean and give the mirror a less refined appearance.

UL Recognition

UL Recognition ensures independently tested safety, dependable performance, easier code compliance, and greater long-term value.

VS

Without UL Recognition

Without UL Recognition, there is no independent verification that the electrical components meet recognized North American safety standards.

UL-Certified Wiring & Connectors

All internal wiring and connectors are UL certified, ensuring safety, reliability, and consistent performance in humid environments.

VS

Non-Certified Wiring & Connectors

Wiring and connectors are critical to product longevity. Non-certified components can be unreliable over time and may lead to performance issues.

GRANDMIRRORS VS Other Mirrors

✓ Rock-Solid Power Supply

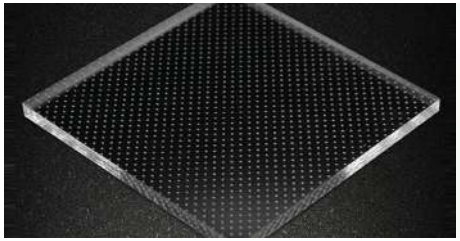

Premium Mean Well power supplies deliver exceptional reliability, IP67 waterproof protection, UL compatibility, and easy servicing, with options for DALI, TRIAC, and constant voltage systems.

VS

Non-Waterproof, Mirror-Mounted Power Supply

Power supplies are not waterproof and are mounted directly to the back of the mirror. Heat build-up may cause deterioration and reduce lifespan over time.

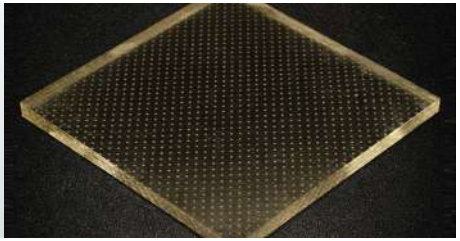

✓ Japanese-Manufactured Acrylic Light Boards

Made from premium Japanese optical acrylic for maximum transparency, durability, and long-term clarity without yellowing.

VS

Standard Light Boards

Conventional light boards offer lower clarity and transparency and may yellow over time.

✓ SMD LED Technology

Grand Mirrors exclusively uses SMD LEDs for higher efficiency and brightness.

- SMD LED: 110 lm/W
- COB LED: 70 lm/W

This results in brighter illumination with significantly lower energy consumption.

VS

COB LEDs

COB LEDs are often used to conceal LED points without specially designed housings. However, they deliver 30-40% less light output per watt compared to SMD LEDs.

✓ Ongoing Product Testing

All parts and components are regularly tested in extreme climate simulation chambers to identify potential issues. This ensures Grand Mirrors are reliable not only for residential bathrooms, but also suitable for demanding environments such as hospitality, marine, and aerospace applications.

VS

Unknown Testing Procedures

Mirrors are typically expected to last 10-20 years. Thorough and transparent testing is therefore essential to support such performance expectations and product claims.

LIGHT OPTIONS

Grand Mirrors integrates a light transfer technology, which causes the light to be directed right towards you resulting in a very effective light that is up to 3 times brighter than other mirrors.

Choose from Warm, Cool, True Light, RGBW, or Custom LEDs.

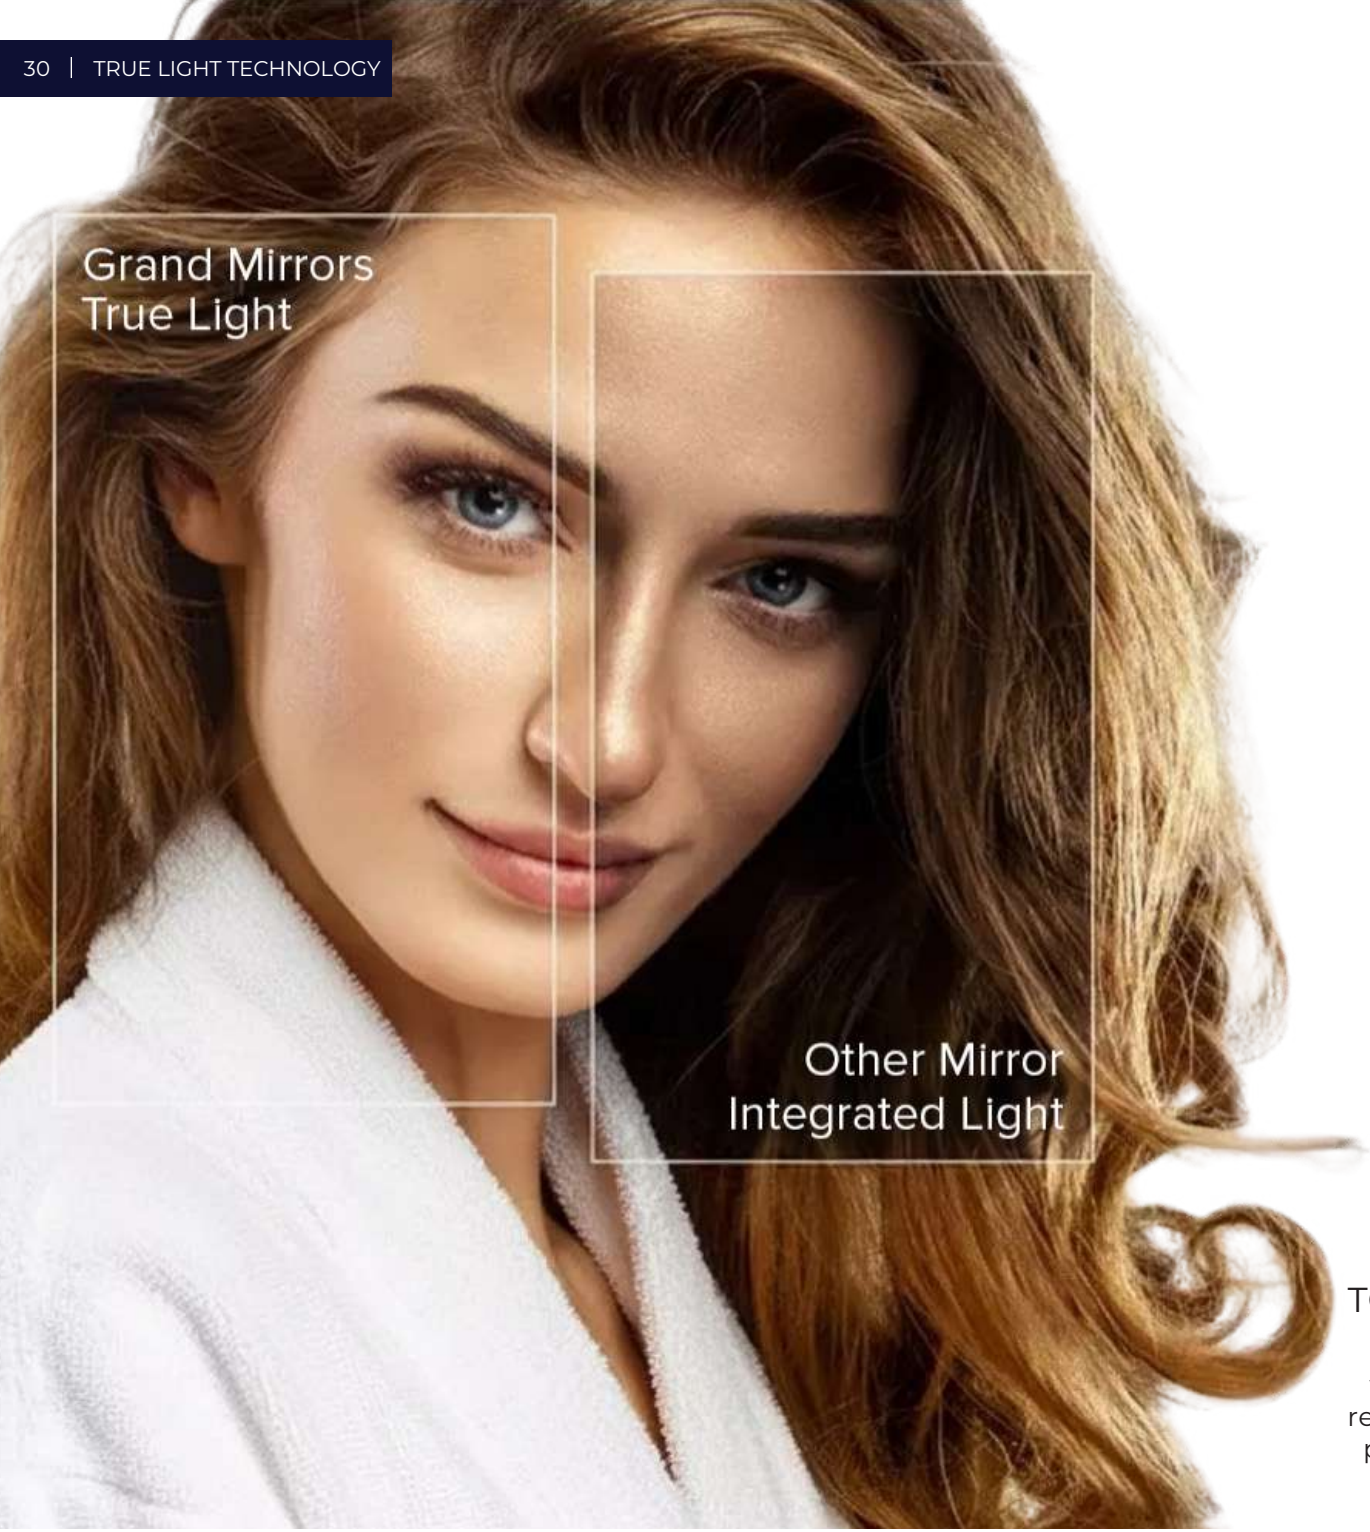

For the Warm, Cool, True Light, and RGBW have wireless dimmers available. You also have the option to add Premium LED lights with dimmers.

PREMIUM WARM (2700K)	**PREMIUM** WARM (3000K)	**PREMIUM** NATURAL (4000K)	**PREMIUM** COOL (6000K)
PREMIUM COOL (6500K)	**PREMIUM** RGBW	**PREMIUM** TRUE LIGHT (2700K–6200K)	CUSTOM LED LIGHT

SMART PHONE CONTROL

(PREMIUM RGBW LED only) Simply download the App and instantly control the colours and brightness. You can also choose from different programmes that best suit you.

GRAND MIRRORS TRUE LIGHT TECHNOLOGY

With True Light Technology, you don't need to choose between cool and warm light any more.

Getting ready for your day at work? The cool tone simulates the light in the office, while the warmer colour will represent the colour for a night out.

Do you want to match the light exactly with other lights in the bathroom?

Choose from the full spectrum between 2700K and 6200K and quickly set the colour and brightness with the wireless remote control.

TOUCH CONTROL 430

Easily control your lighting with our Touch Control 430 remotes, included with every purchase of a Grand Mirrors True Light product.

TOUCH CONTROL REMOTES

- Wireless and to be used within 15m / 50ft of the mirror.
- Turn the mirror on and off, change the brightness, change the colour of the LED light, programme and save personal setting.
- Smooth on-off (the light decreases and increases in brightness when turning off and on).
- Support different mirrors with only one controller.
- Supports up to 4 controllers, so use where convenient.
- Use the controller anywhere you want. Mount to the wall, or on the countertop, stick it against the mirror, or just carry around.
- Sync easily to the mirror light
- Stylish and durable design. Made of durable glass, easy to clean.
- Use 2x AAA batteries (estimated battery life: 14 months with average use).

Touch Control 400

For Premium LED Lighting in Cool, Warm, and Natural
